

# Kalkutin Evgenii

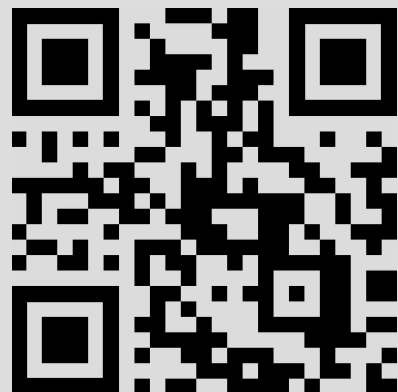

Engineering without permissions

I orchestrate and  
optimize the stack —  
**chaos is my playground**

Full-stack engineer and system architect who turns complex requirements into scalable, resilient, and high-performance systems. I design and implement clean architectures, CI/CD pipelines, and cloud-native solutions that solve real-world problems at speed.

- ⚡ AI-driven workflow
- 🗄️ SQL & NoSQL
- 🐙 Version Control
- 📦 Container orchestration
- ↕ Scalable infrastructure
- © Clean architecture

# Kalkutin Evgenii

Turning complexity into elegant solutions

## EXPERIENCE

### Team Lead @ Fabit

APR 2022 - JAN 2025

Led the development of key federal-level IT projects, ensuring the scalability of platforms used by over 5 million users

Managed a team of 12+ developers, implemented code review standards and CI/CD, increasing release speed by 50%

Optimized system architecture, reducing request processing time by 40% and decreasing server load by 30%

Managed a team of 12+ developers, implemented code review standards and CI/CD, increasing release speed by 50%

Organized development and planning processes, enabling project completion 20% faster than initially scheduled

### Team Lead @ Nike

MAR 2020 - FEB 2022

Led the development of an AI-powered email editor for Nike, optimizing content and increasing user engagement by 35%

Implemented an automated email template testing system, reducing QA costs by over \$200K per year

Improved data processing in AWS SES, achieving a 99.9% email delivery success rate and reducing spam by 60%

Introduced new development processes, boosting team productivity by 25% and decreasing the number of bugs by 40%
